# Prairie's Got the Goods Week!

**Presenter:** Jeremy Hogan, (He/Him), Director of Prairie Grassland Conservation, Nature Conservancy of Canada

## **Presentation Summary:**

Canada's prairie grasslands are incredibly biodiverse and productive landscapes, but unfortunately, they are also one of the most endangered ecosystems on the planet: less than 20% of Canada's prairies remain intact, and less than 6% is protected. These grasslands offer more than wildlife habitat and natural beauty: they are a working landscape with a rich cultural heritage that provides billions of dollars in economic value and ecosystem services every year. Thanks to generations of careful stewardship by local communities and landowners, it is not too late to act. Join Jeremy Hogan, Director of Prairie Grassland Conservation for the Nature Conservancy of Canada, to learn about the significance of our native grasslands and how together, we can ensure they thrive—now and for generations to come.

## **About the Presenter:**

Jeremy Hogan is the Nature Conservancy of Canada's (NCC) Director of Prairie Grassland Conservation. In this role, Jeremy leads NCC's Prairie Grasslands Action Plan, which seeks to conserve more than 500,000 hectares (1.2 million acres) of Canada's highly endangered Prairie ecosystems by 2030. Prior to joining NCC, Jeremy spent 10 years at the University of Calgary conducting ecology research in Northwest Costa Rica. Observing firsthand the impact of community-led conservation action he is thrilled to have an opportunity to apply his enthusiasm and expertise in his own backyard, and to help ensure that these amazing ecosystems remain intact and thriving for his young family—and future generations—to cherish in the future.

PCAP's Prairie's Got the Goods Week is an annual series of webinars focusing on the goods and services provided by the native prairie ecosystem.

Hosted by: Caitlin Mroz-Sailer, Stewardship Coordinator, Saskatchewan Prairie Conservation Action Plan
